

March 5, 2009

Dear Client,

We are writing to you today to let you know that James River Technical, Inc. will no longer be providing SGI products and services, effective immediately. A number of factors entered into our decision not to continue this relationship.

JRT has delivered in excess of \$275 million in best-in-class High Performance Computing solutions over the past thirteen years. As always, JRTI stands ready to server the needs in the Higher Education, Research, Government and Commercial markets with an expanded portfolio of innovative solution sets, from a growing family of High Performance Computing partners.

JRT has alliances with CRAY, DELL, Velocity Micro, ScaleMP, Cyviz, and NVIDIA, amongst other strategic partners, which are identified on our website (www.jrti.com). We will continue to expand our vendor alliances as new innovative technologies are introduced to the market and can be beneficial to our clients in their quest for discovery.

With a keen understanding of the user requirements in the HPC markets, JRT has formed strategic partnerships with professional services organizations and field service providers to continue to compliment our partners with the design, integration, installation, and support of the solutions that we will provide to the market. We look forward to working with you and your colleagues in the future. Expect nothing less than the best from JRT!

Regards,

Leo Iantosca
CEO & Chairman
